

Expert advice. Right from the beginning.

Pregnancy can be one of life's most rewarding and challenging experiences. Difficulties with conception, unexpected complications and even general questions can lead to uncertainty and anxiety. Best Doctors can help.

Best Doctors provides access to a wide range of medical experts—including obstetricians and perinatologists—to help members understand and address pregnancy challenges.

Our leading physicians answer questions, review diagnoses, reread ultrasound images, offer recommendations, and provide a thorough expert review. That means members with pregnancy concerns can be certain they're making the right decisions and getting the right care.

“Terrific. I was impressed by the personal focus, service and attention to my medical needs.”

Best Doctors' medical experts can help with a wide range of pregnancy issues from conception struggles to perinatal concerns. Our leading specialists:

- Provide expert second opinions on high-risk and/or complicated pregnancy diagnoses
- Review abnormal prenatal ultrasounds and offer expert advice
- Provide answers to questions related to any aspect of pregnancy, from pre-conception to post-birth
- Help expectant parents understand pregnancy challenges, procedures, scans and medications
- Provide questions to ask when choosing your hospital and what to expect if your child is moved to a neonatal intensive-care unit (NICU)

Best Doctors can also recommend leading physicians who are experts in infertility, high-risk pregnancies, genetic testing, premature births, post-partum conditions and other considerations. What's more, our services complement those of your gynecologist, obstetrician or pediatrician. So you get all the attention and care you need.
